# Backup Procedure for Ti5, Ti7, and Ti10 Displays

To create a backup of the settings:

1. Insert a USB drive into the display
2. Go to Menu > System Settings
3. Change the system mode to Advanced (press OK without a password)
4. Go to About > System Manager > Backup
5. Choose between the options: Create or Restore
6. Select the desired backup and confirm on the screen.

If you want to delete previously created backups, go to Delete Backups.

You can also import or export backups from another display via USB drive.

You can find the **video guide** [by accessing this folder](#) and searching for **video 5 - How to perform backups on HxGN AgrOn Ti5 and HxGN AgrOn Ti7 displays - 04-20-v3.3.0..**
