

HEXAGON
AGRICULTURE

Software update

A new software update for Ti5, Ti5+, Ti7 and Ti10 controllers is available.

Hexagon's Agriculture division is constantly working on new features for their equipment and making them available to the market for free.

We strongly recommend upgrading to get the best performance from our solutions.

If your display version starts with **3.X.X**, please update to the latest version by clicking on the following link.

[Click here](#) to find out how to identify the display version / differences between Ti5 and Ti5+.

[Click here](#) to find the latest version and its release note.

[Click here](#) to download the **PDF guide** for software update, or if you prefer

[Click here](#) to access our **Frequently Asked Questions** video folder and look for video 10 to watch the upgrade process.

If your display version starts with **2.X.X**, it is necessary to format it.

Heads up! Formatting will erase all files from your display.

You can backup the settings before formatting, [following this procedure](https://tix-website-resources.s3.amazonaws.com/procedimento-de-backup-para-display-ti5-ti7-e-ti10 .pdf).

[Click here](#) to download the **guide in PDF** of formatting procedure, or if you prefer

[Click here](#) to access our **Frequently Asked Questions** videos folder and look for videos 14 and 15 to watch the formatting process.

For more information, consult the user manual or contact our support team.
